

West Burton Power Station  
West Burton  
Retford  
Notts  
DN22 9BL

Dear Resident,

**West Burton Power Station Demolition Update**

We wanted to take the opportunity to update you on the current status of the demolition of West Burton Power Station, in particular provide you with advance notice of the next milestone.

As you may be aware, the demolition of West Burton started in June 2023, and the site landscape is beginning to change. We're pleased to report that, as Principal Contractor, Brown and Mason are currently progressing demolition works to plan.

On 29<sup>th</sup> of January 2026, we have the sixth explosive event scheduled at 10:00 hours to bring down the Boiler House and Conveyor Bays. The explosive demolition event will not impact local businesses, residents, the community or local traffic.

There will be a number of small explosions over a short period of time (approximately 10 seconds) during which time the Boiler House and Conveyor Bays will collapse under controlled conditions. Although the explosion and collapse may be heard off-site, any noise will be over very quickly. Any dust generated will be controlled on site, and road sweepers will be available, although it's anticipated they will not be required.

The exclusion zone for demolition is well within the power station boundary fence, and there will be no public access to view the area. There will be no impact on the local road network.

Demolition of the Boiler House is considered to be a low-profile/low-impact event, local authorities and the Police have been consulted, and it has been agreed that emergency services, with the exception of a minimal police presence, will not be required on-site.

The other main structures, including the Chimney and Cooling towers, are scheduled for explosive demolition during the project. Further details on these milestones will be provided nearer the time. The complete demolition of the site is expected in early 2028.

We will update you with further details closer to the time, however, if you would like more information or have any questions, please do not hesitate to contact us:
